TIPS: CAFE HOPPING

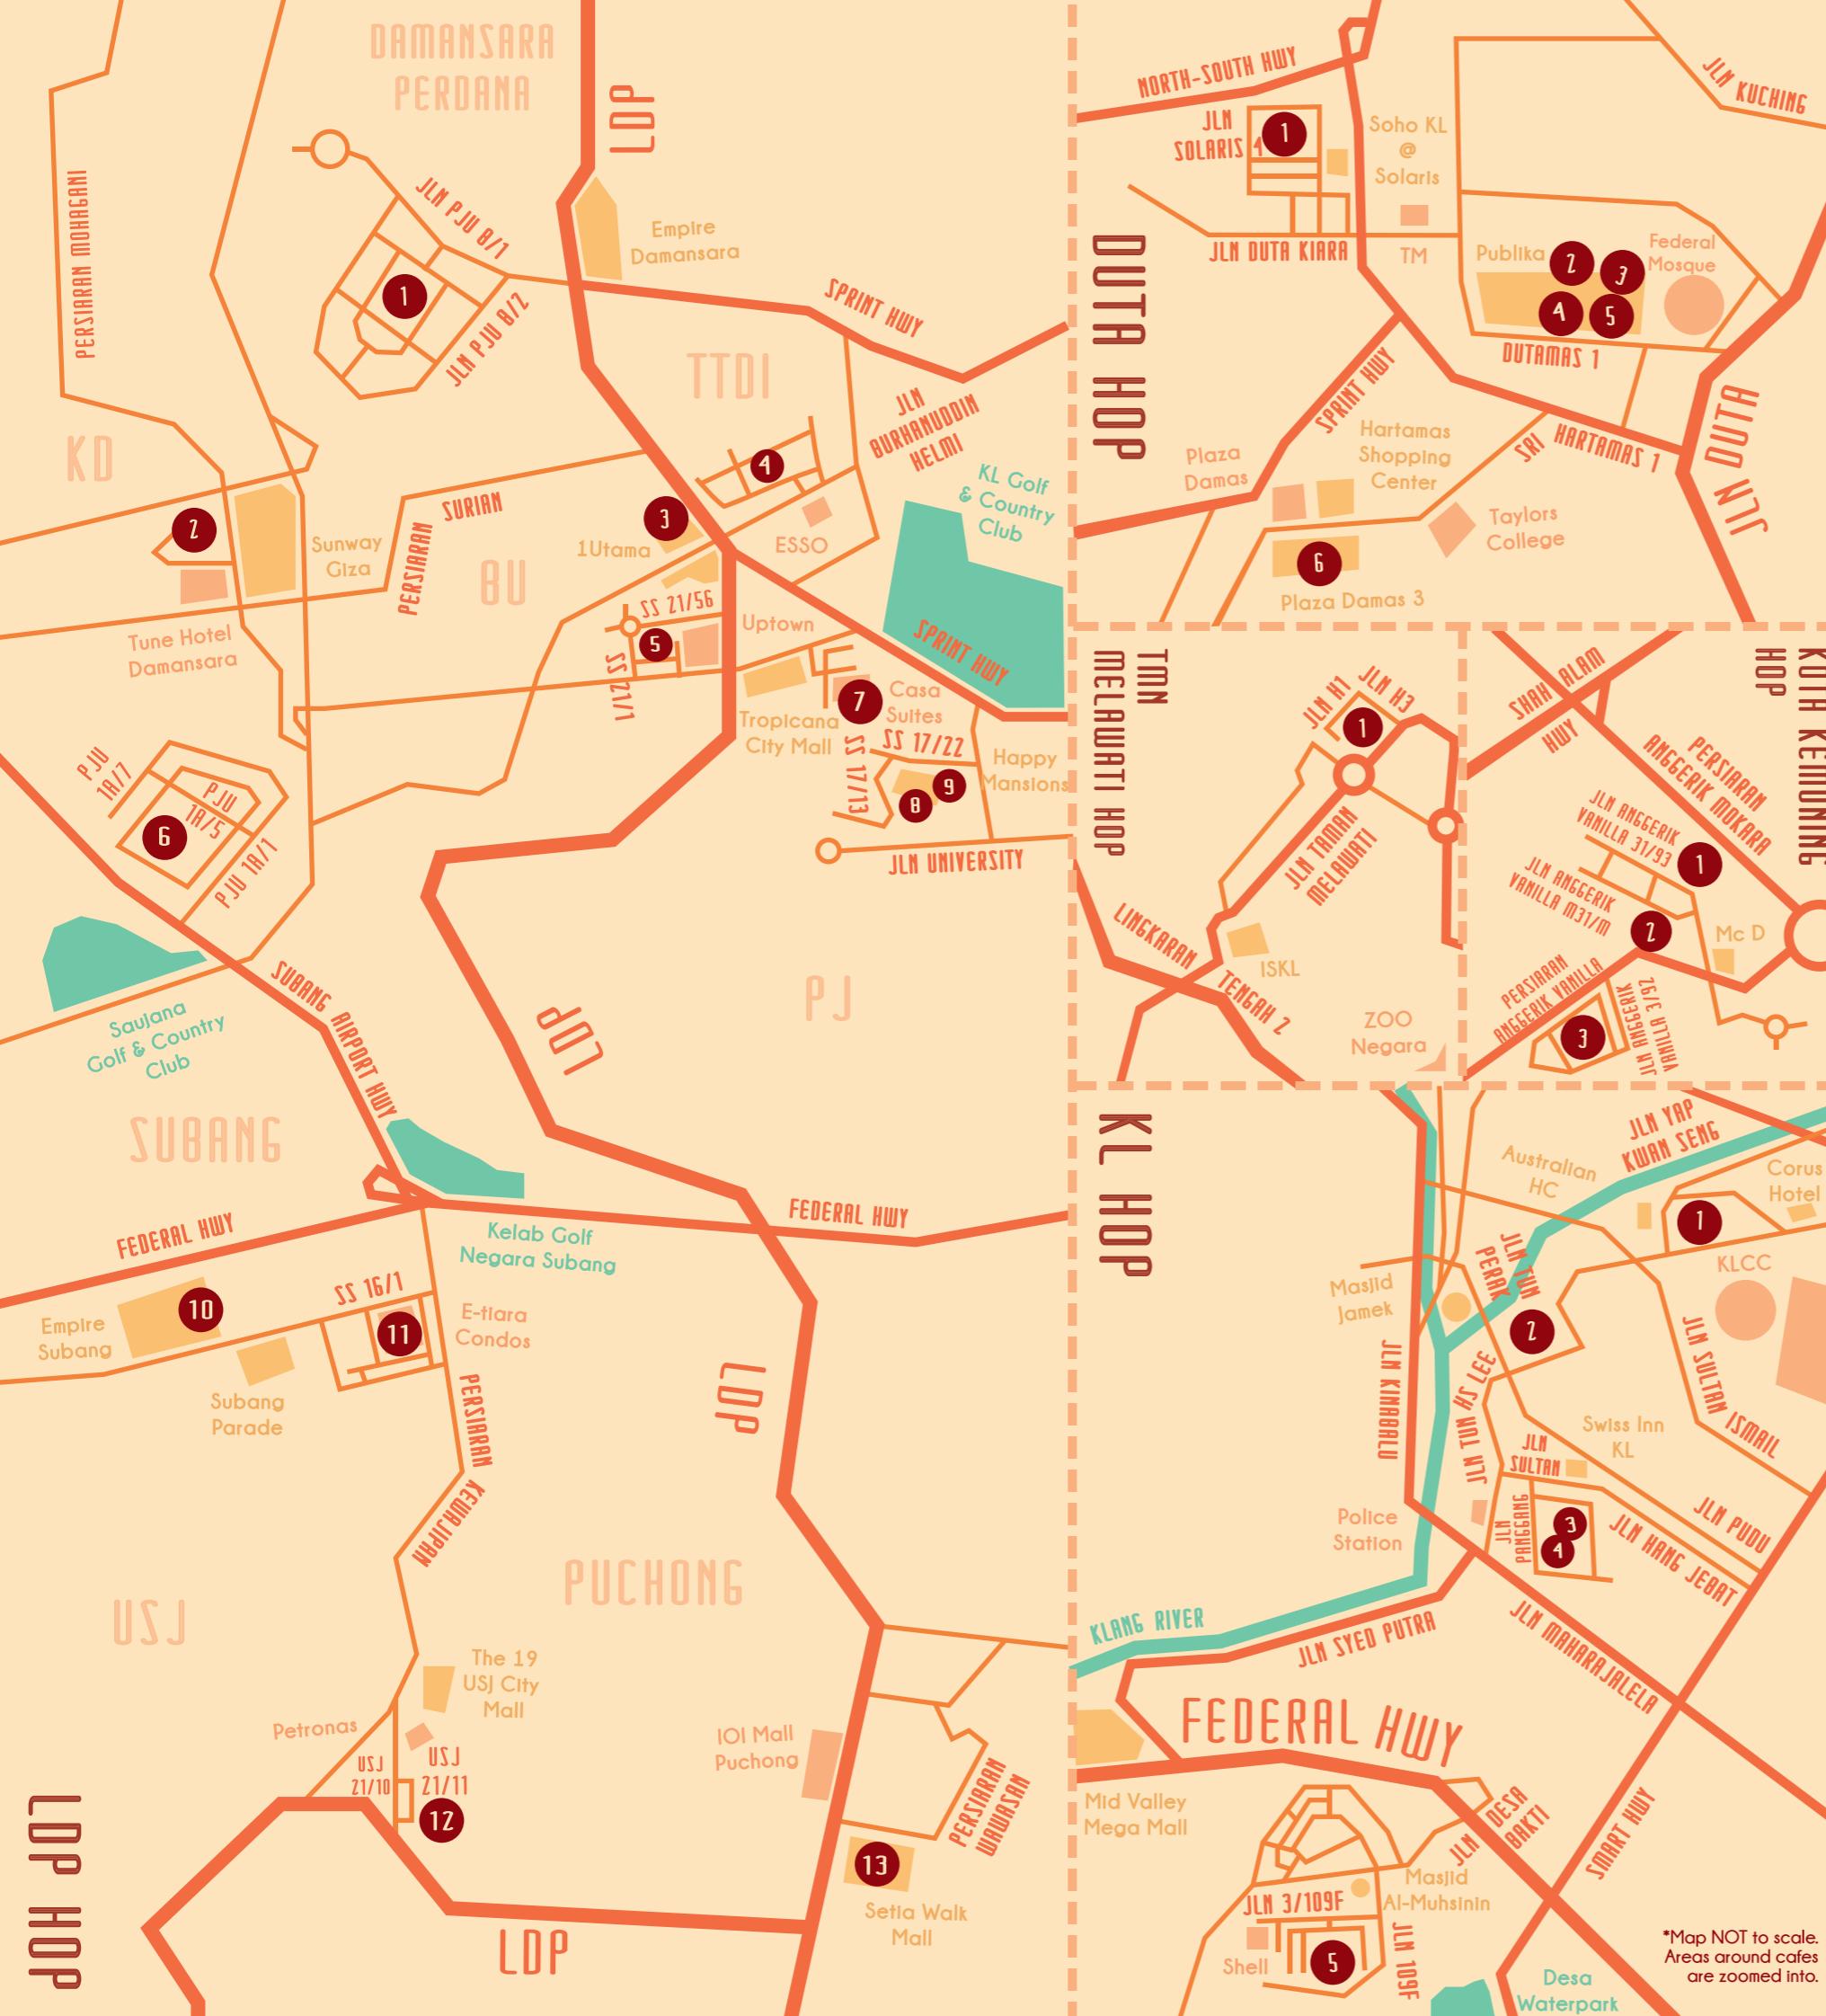

While cafe hopping at these **28 cafes** listed, try the following:

- 1 Try coffee **without** sugar as it changes the natural taste of the coffee.
- 2 **Chat** to your barista during the quieter periods and you might even get a freebie or two!
- 3 **Good coffee starts at its source.** Some coffees are a blend of beans from different regions and some are from one single farm or region. Besides the type of beans and where they are grown, the way the coffee fruits are processed to get the coffee beans determine the flavour and quality of the beans.
- 4 **Find a roast that suits you.** Darker roasted beans will have caramel, chocolatey and bitter flavours; common in our local traditional roasted coffee. A lighter roast brings out sour/acidic, fruity and floral flavours.
- 5 Some cafes serve **hand-brew coffee** only or have a hand-brew option which means that coffee is brewed not using an espresso machine but by hand using different devices. Try the lighter tea-like pour-overs, the cool looking syphon's more intense brew to the fuller-bodied, portable french press.
- 6 We hope you find a place where they are **nice** to you and have **great coffee**.
